Decontamination Certificate - Repairs

Please complete the details below. Failure to complete this form may result in disposal of contaminated items sent for inspection as clinical waste.

The items returned for inspection as detailed have been thoroughly cleaned to remove all biological and other contamination before submission for inspection and have been sterilised by the method indicated below.

Please tick appropriate box:

- Autoclave at 134 degrees
 - Autoclave at 121 degrees extended time
 - Ethylene oxide
 - Soak sterilant (enter name of agent used)
 - Sterilisation not possible - item is clinically clean
-
